MyFirstApp/ project root

app/ ← where you write code

src/main/

- java/…/MainActivity.kt ← logic code
- res/ ← resources (images, text, colors)
- AndroidManifest.xml ← the app's "birth certificate"

build.gradle.kts

Declares dependent libraries (SDK version, Compose,

src/androidTest/ and test/

Automated test code (used in Chapter 56)

Other files in the root

gradle/ + gradlew.bat ← build scripts

settings.gradle.kts ← project settings

(Beginner's rule of thumb: touch only the app/ folder, treat the rest as a "black box" for now — don't touch)

.gitignore ← version-control ignore list
